

ExpressK is The Optimum Key Management Software for Small Business

- Easily manage keys, key holders, doors, locks, equipment and floor plans;
- Provide total key control showing outstanding keys, overdue keys (*with automatic notifications*), key symbols, etc.;
- Quickly process your key issuances & returns;
- Preventive maintenance scheduling and history (*using also the Maintenance Wizard and Calendar tools*);
- User-friendly and comprehensive interface with Tree View and customizable grids to explore data;
- Floor plans with icons showing the location of every lock or equipment, linking to complete information, associated keys and list of key holders. Easily locate any lock or equipment (*direct link from door records to diagram*);
- Manage all kinds of equipment : doors, cameras, card readers, fire extinguishers, first aid kits, defibrillators, desks, file cabinets, pull stations, etc.
- Automatic configurable key numbering (*by key or general for sequence numbers*);
- Use of signature capture for efficient and paperless processes;
- Load your data quickly by importing keys, key distribution lists, doors and people with customizable MS Excel import templates;
- Link photographs and documents of individuals holding keys, doors, etc.;
- Stand-alone, single-user with password protection;
- Reports, queries and forms (*easily sort, filter and group on all data, use reporting tool to create and export data to MS Excel spreadsheets*);
- Flexible, customizable and many configuration options (*adapt text labels to your terminology, customize the form and templates, define your color labels, etc.*);
- Developed by Prosystem inc., a company of professionals in software engineering, serving important businesses for more than 20 years. Prosystem is also the developer of SimpleK, *The Most Advanced Key Management Software*;
- Comprehensive learning tools (*Step-by-step, Tutorial Videos, Wizards, Online Support, etc.*);
- Install in a few clicks;
- Online technical support (*Ticket System*);
- And much, much more!

Features

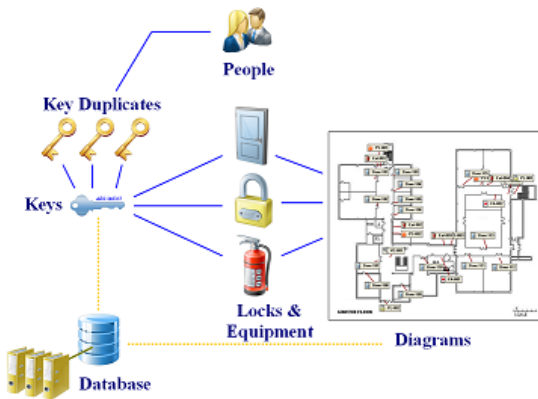

Designed for small business, ExpressK is the optimal key management solution, offering:

<i>Features</i>	<i>ExpressK</i>
	<i>Single user</i>
Database Type	SQL File
Max. Number of Users	1
Max. Number of Records ¹	Unlimited
Reports, History & Form (<i>Easily Printable and Exportable</i>)	√
Charts (<i>Graphical charts presenting statistics about Keys, Locks & Equipment</i>)	√

Free Automatic Updates	√
Help (<i>Help file with text search and index</i>)	√
Learning Tools (<i>Step-by-step, Tutorial Videos, Wizards, etc</i>)	√

¹ The maximum number of records is not limited by ExpressK (depends on the maximum database size).

Strong & Reliable Database

To fully integrate all the information in a well organized and optimal manner, ExpressK relies on a strong relational database, here is summary diagram:

ExpressK uses an SQL File type database with encryption.

Data Importing Tools

ExpressK offers many tools to load your data easily. You can create your own customized MS Excel import template such as Key List, People List, Duplicate Distribution List and Door Survey by selecting the fields you need.

Import Templates

Quickly load your data!

Microsoft .NET Framework

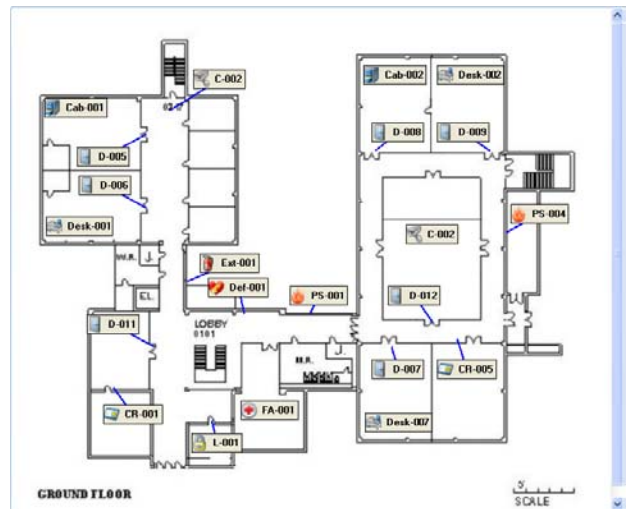

The .NET Framework is a Microsoft technology that provides features and functions to programs running on Windows platforms. Applications that use the .NET Framework are able to exploit the latest features and technology, and are assured of being compatible with current and future versions of Windows.

ExpressK is developed using Microsoft .Net technology and requires “.NET Framework 2.0”. Generally, the framework is automatically installed on Windows XP, Windows 2003 or later and Vista.

“A diagram is worth a thousand words”

What’s better than a floor plan to quickly locate a specific door? How about an electronic diagram tool with search engine!

ExpressK allows you to import maps and floors plans (*converted dwg to jpg, bmp or gif*) and add door icons to dynamically link them to your database. This way you can navigate quickly from your door datagrid to floor plan, click and access your complete door information with associated keys, “Who has access”, etc.

Locate the appropriate door in one single click!

Paperless Processes

ExpressK helps improve your key control processes in many ways with integrated form, tools, and by removing paper from signing documents (*e.g: key issuance agreement*). ExpressK is compatible with Topaz Systems electronic signature capture products, **allowing electronic handwritten signatures to be bound directly to digital documents**. It will generate detailed, time-stamped document history of the entire approval process.

Recommended Requirements

User Workstation Recommended Minimum Requirements

Operating system	Windows XP, Windows Vista, Windows 7, Windows Server 2003 or later
Processor	1.4 GHz Intel Pentium or equivalent processor
RAM	1024 Mb
Hard drive	100 Mb of available hard-disk space
Optical reader	CD-ROM reader
Display	VGA display with 1024x768 resolution or more
Additional components	"Microsoft .NET Framework 2.0"
